Vector InfoTech Pte Ltd Achieves ISO 9001:2000 Certification

Singapore, January 10, 2005 – Vector InfoTech Pte Ltd, a regional provider of Industrial Telecommunication & Data Communication Systems and Networking Products, proudly announces that the company has successfully obtained the ISO 9001:2000 certification for conforming to the Quality Management System Standard – a quality standard that is recognized and respected worldwide.

The registration approval was received from SGS International Certification Services, a global leading inspection, verification, testing and certification company whom act as an independent party to execute an extensive review of the company's quality management system.

This ISO 9001:2000 certification is valid for our: "Design of Industrial Telecommunication & Data Communication Systems and Networking Solutions" and "Supply of Industrial Telecommunication & Data Communication Systems and Networking Products".

The new version of the ISO 9001 standard places greater emphasis on top management involvement in the quality process, as well as greater focus on customers' satisfaction and continuous improvement. The new standard is designed to cover all the important processes affecting the quality of the products, solutions and services.

Our company recognizes that excellence must be an on-going. This award represents the commitment of the entire company to deliver quality products and solutions that conform to worldwide quality standard.

With a sound and reliable framework of quality procedures firmly in place, Vector InfoTech strengthens its position as a total provider of Industrial Telecommunication & Data Communication Design and Solutions.

About Vector InfoTech

Established in 1992, Vector InfoTech is widely recognized as an expert in the field of industrial communications and networking systems. We design and supply complete system solutions including hardware, software and engineering services. Our expertise is extended as well to total turnkey telecommunication system packages.

The total solutions we developed and high performance communications products we endorsed are applied in fields such as Process Automation Controls, Communication and Network Infrastructures, System Interfaces and Integration, Wireless Communications, besides other areas of industrial and commercial applications.

Our achievements supplying reliable high performance products and complete solution systems has been proven with a consistent track record of cordial and strong working relationships with renowned local and global organizations hailing from diverse industries. Included amongst our reputable customers are multi-national corporations from industries in Chemical, Oil and Gas, Power Utility, Water and Effluent Treatment, Building Automation, Production, Food and Drinks, Transportation, Telecommunication, and Environmental Technology.

With our pool of experienced, fully qualified engineers and dedicated support staff, coupled with strong working partners, we shall continue to provide quality, cost-efficient reliable systems and solutions to our valued customers.

Yours sincerely,

The Management
